

Nencki Institute of Experimental Biology

"Brain Tumors Meeting 2016 - From Biology to Therapy" conference

2016-05-23

The "Brain Tumors Meeting 2016 - From Biology to Therapy" will take place in the Nencki Institute on June 27-29, 2016 in Warsaw, Poland. The conference is organized by The Nencki Institute in collaboration with the Institute of Psychiatry and Neurology, and Foundation of Clinical and Experimental Oncology. The Conference brings together the world-leading experts in the field of neuro-oncology. The main aim of the conference is an evaluation of the current state of the art in diagnosis, biology and therapy of brain tumors. Complex

interactions between tumor cells, microenvironment and host immunity will be discussed. The conference provides unique opportunity for students and young investigators to present posters and be selected for short talks. Collegial environment will foster interdisciplinary cross-talks and spark new scientific collaborations. Thanks to its high scientific quality, avoidance of parallel scientific sessions, specialized topics focused on basic and clinical research on brain tumor biology and therapy, it will provide an exceptional chance for extending knowledge and catching up with recent advances in innovative therapies of these deadly tumors.
