

Nencki Institute of Experimental Biology

Dr Paweł Dobrzyń from the Nencki Institute a winner of the LIDER Programme

2011-04-27

The project entitled “Cardiac-specific underexpression of SCD1 and SCD4 genes – a new strategy in therapy and prevention of obesity-related heart failure” will last three years. The aim of the LIDER Programme is to support of researchers’ career development, especially increasing the competencies of self-reliant planning and managing a research team through the realization of application-oriented research projects.
