

Nencki Institute of Experimental Biology

Flow Cytometry Workshop at the Nencki Institute

2013-04-08

The workshop is dedicated to young researchers with some experience in flow cytometry as well as the more experienced researchers responsible for publishing of flow cytometry data. Lectures will be given by specialists in the field using modern flow cytometry techniques. We would like to highly recommend the special Session organized under the patronage of ISAC which will be held by the Editor-in-chief of the Cytometry Part A Journal, dedicated to publication of high quality data in cytometry. The second day will be dedicated to the practical for the selected participants.
