

Nencki Institute of Experimental Biology

From the Nencki Institute to the pharmacies

2016-05-30

In autumn last year, the project of the National Research and Development Centre PBS1 / B8 / 1/2012 was completed, whose beneficiaries were the Nencki Institute PAS (Laboratory of Jerzy Duszyński and Laboratory of Adam Szewczyk) and the Scientific and Research Centre Dr IRENA ERIS. The results of the project were published, among others, in the Journal of Investigative Dermatology. There has also been a joint patent application, which was the basis for the introduction of a few weeks ago a new dermocosmetic series Pharmaceris V. The products are recommended for adults and children for protection and daily care, compensate of skin color in patients with a vitiligo problem and de-pigmentation changes (www.pharmaceris.com).
