

Nencki Institute of Experimental Biology

Grant for Witold Konopka in the TEAM-TECH programme

2017-12-21

The Foundation for Polish Science (FNP) has settled competition for core facilities, which offers funds for designing and developing research services using the advanced research equipment. One of the winners is Dr. Witold Konopka from the Laboratory of Animal Models, Neurobiology Center at the Nencki Institute, who received a grant in the TEAM-TECH Core Facility PLUS programme. The aim of the research will be to create an integrated platform for generation and analysis of animal models for the application in biomedical research.
