

# Nencki Institute of Experimental Biology

## International Conference "Inhibitory Control of Brain Plasticity - Bio-imaging Methods Reveal Brain Physiology"

2013-09-03

### Main topics

- Molecular aspects of inhibitory dysfunction in epilepsy.
- The role of inhibitory interactions in modulating of synaptic and circuit plasticity
- Inhibitory control of the oscillatory activity
- Bio-Imaging of inhibition
- Function of GABAA receptors in the synaptic time
- Molecular processes underlying inhibitory synaptic interactions
- Early and late phases of brain development, control of critical periods
