

Nencki Institute of Experimental Biology

International Neuropsychological Society, 2010 Mid-Year Meeting, Krakow, June 30th - July 3rd

2010-07-09

The theme of the meeting was “Developing Connections Between Neuropsychology and Neuroscience”. This theme has been selected to stimulate the submission of work that focuses on integrating clinical/applied approaches and experimental approaches to neuroscience.

Around 500 participants from 37 countries attended the meeting.

The conference was preceded by Continuing Education Workshops focusing on translational aspects of scientific achievements to clinical neuropsychology.

Scientific Program Committee Co-Chairs: Anna Grabowska & Peter Arnett

Director of Continuing Education: Jennifer Manly

Local Steering Committee Chairs: Emilia Lojek & Piotr Wolski

Special events coorganized/co-sponsored by the Nencki Institute:

1. Plenary lecture by Małgorzata Kossut: Learning Induced Brain Plasticity
2. Invited Luria/Konorski Symposium

The intention of this symposium was to look from the perspective of the modern science on Luria and Konorski ideas that were the milestones in the development of neuroscience and neuropsychology.

Participants:

Charles Gross, Princeton University, USA

Bogdan Dreyer, University of Sydney, Australia

Elkhonon Goldberg, NYU School of Medicine, USA

Tatiana Akhutina, Moscow State University, Russia

Anita Cybulska-Kłosowicz from the Nencki Institute was a winner of Nelson Butters Award – presented for

the best submission by a postdoctoral fellow: “Involvement of Retrosplenial and Anterior Cingulate Cortex in

Classical Conditioning”: Co-authors: A. Brzezicka, R. Zakrzewska, M. Kossut
