

Nencki Institute of Experimental Biology

Laureate of the "POMOST" programme of the Foundation for Polish Science

2012-03-19

The objective of the project is to investigate the role of multiinnervated spines in memory formation.

Thanks to the the BRIDGE programme, that the main purpose is to enable the best researchers who are raising young children to return to advanced research work, Dr Radwańska will receive a research grant funding, including fellowships for a PhD student, for a total amount of 413 000 PLN . More information about the programme at:

http://www.fnp.org.pl/programmes/overview_of_programmes/grants_and_scholarships/parent_bridge_programme

We are looking for highly motivated candidates for PhD students to work on the project
