

# Nencki Institute of Experimental Biology

## Little Man Science Festival

2012-10-01

---

Workshops for children were held at the Faculty of Physics, Warsaw University of Technology. On September 30th Nencki PhD candidates set up the Biology kindergarten which was popular among children and acclaimed by their parents. Preschool workshops combined the elements of experimental biology and great fun. Kids concocted “magic elixirs” and by themselves handled a microscope connected to a computer.

Nencki’s contribution to the 16th Science Festival has been coordinated and supervised by Anna Wasik.
