

Nencki Institute of Experimental Biology

National Parks in Utah and Arizona (USA) at the Nencki Institute

2013-03-20

The exhibit shows 58 photographs by Prof Andrzej K. Tarkowski and Monika Tarkowska-Carter with Michał Carter taken during their tour of 6 US national parks in September of 2008. The colours of wilderness, the unique landscapes of monumental rock formations and the flora of desert areas of southern US states have been rendered perfectly by the high quality photographs on exhibit.
