

# Nencki Institute of Experimental Biology

## Science Festival 2017 at the Hydrobiological Station in Mikołajki

2017-11-20

On Friday, November 17, 2017, the SCIENCE FESTIVAL was held at the Hydrobiological Station of the Nencki Institute in Mikołajki, organized in collaboration with the Mazurian Landscape Park. This year we have extended the educational program by including archaeological workshops led by archaeologists from the Warsaw University (the "Terra Desolata" group). About 230 children from 7 schools in our region (Mikołajki, Giżycko, Ryn, Dabrowka, Okartowo, Nawiady and Hejdyk) took part in this event.
